Subsoil drains shall be open-jointed, horizontally split or perforated pipe conforming to one of the standards listed in Table 1102.5 of the International Plumbing Code. Such drains shall not be less than 4 inches (102 mm) diameter. Where the building is subject to backwater valve, subsoil drains shall discharge to a trapped area drain, sump, dry well or approved location above ground. The subsoil sump shall be required to have either a gas tight cover or a vent. The sump and pumping system shall comply with Section 1113.1 of the International Plumbing Code.
