**PUBLIC BORE/CUT PERMIT
RULES AND REGULATIONS**

City Code Section 14-204

- A. It is an offense for any person to bore under, alter the subsurface, or change in any way a public street, alley or way without securing a permit from the city and approval of the city staff to make such bore or change. This requirement shall not apply to any person or firm acting under direct supervision of the city. A fee shall be paid for the permit in the amount established by the city council. Franchised public utilities are required to secure permit for city record purposes but are exempt from paying a fee.
- B. Engineering plans shall be provided for each such crossing with ties to land lines and physical features. All construction shall be in accordance with details "C", "D" and "K" on Sheet M-1 of the city standard design details, latest revision thereof. All lines shall have a minimum cover of three (3) feet in the ditch line and must clear any existing line by one (1) foot minimum outside to outside. The contractor doing the work must provide a one (1) year PERFORMANCE BOND IN THE AMOUNT OF \$ 5,000 to the city covering the work. The contractor is responsible for all repair or replacement, barricades, public notices, and safety devices covering the work. He shall have an approved plan from the city and notify the city at least seventy-two (72) hours in advance of construction time before beginning the work.
- C. The city inspector is to be notified as indicated above and shall have a representative on site during the work. All pipelines crossing city streets shall be bored unless specific permission in writing is obtained from the city in advance using other city standard details (Ordinance No. 404, 12/18/90).
- D. An initial inspection shall be performed by a city official before the street bore or cut is started. A final inspection shall be performed after the work is completed.
- E. No work is to commence before a permit has been approved and issued by the city. The permit must be on the job site at all times.
